## Virtual reality tool increases nurse confidence in new therapies

### Janssen's implementation of virtual reality training tool

### Results

1) Virtual reality tool launched in the UK.

## CASE EXAMPLE

# Janssen Pharmaceuticals

- International pharmaceutical company based in Beerse, Belgium
  - ▶ After introducing a new blood cancer drug in the UK, realized the need to build oncology nurse confidence around drug administration and side effect management; wanted to create a low-pressure environment for nurses to practice and gain confidence
  - ▶ Created a virtual reality clinic simulation where oncology nurses could practice administering the new drug and managing infusion-related reactions
  - ▶ Rolled out the virtual reality clinic training to 85% of target NHS nurses; 100% of targeted nurses reported that the virtual reality tool would help their clinical practice and better prepare them for treatment initiation
